

OMPRAKASH SHUKLA

Cyber Security & IT Support Professional

+91 7559201476 | omprakashs1602@gmail.com | Jalgaon, Maharashtra

PROFESSIONAL SUMMARY

BCA graduate with Cyber Security training and hands-on experience in network security, vulnerability assessment, and virtual lab environments. Proficient with industry-standard tools including Nmap, Nessus, Wireshark, Metasploit, and Kali Linux, with a solid foundation in networking (TCP/IP, DNS, DHCP) and both Windows and Linux systems. Brings 5 months of professional experience in documentation and administrative support within a remote legal services environment. A quick learner with sharp analytical and troubleshooting skills, committed to building a career in Cyber Security and IT Support.

CORE SKILLS

Vulnerability Assessment • Network Scanning • Network Security • Technical Troubleshooting
Security Reporting • System Administration • Documentation • Problem Solving • Adaptability

TECHNICAL SKILLS

Operating Systems: Windows 10/11, Linux, Kali Linux
Networking: TCP/IP, DNS, DHCP
Cyber Security Tools: Nmap, Nessus, Wireshark, Metasploit, VirtualBox
Programming: C, C++, Java (Basic)
Office Tools: MS Office

PROFESSIONAL EXPERIENCE

Cyber Security Intern (Remote)

Jan 2026 – Present

Digi Defence

- Performed vulnerability assessments and network scans using Nessus and Nmap, identifying and documenting security gaps across test environments.
- Analyzed network traffic using Wireshark to detect anomalies and support security investigations.
- Conducted host discovery and port scanning to support ongoing security posture reviews.
- Applied Metasploit within controlled lab environments to study exploitation techniques and inform stronger defensive practices.
- Documented findings and technical observations clearly to support review and knowledge-sharing across the team.

Legal Assistant

Sep 2025 – Feb 2026

Elpis Global Solution

- Managed legal documents, records, and case-related tasks with high accuracy and strict confidentiality.
- Coordinated documentation workflows in a remote, deadline-driven environment, strengthening organizational and time-management skills.

PROJECTS

Network Scanning using Nmap

- Performed host discovery and port scanning across test networks to map live hosts and open services.

Vulnerability Assessment using Nessus

- Conducted vulnerability scans and reviewed reports, prioritizing findings by severity.

Virtual Cyber Security Lab

- Configured Windows and Kali Linux systems in VirtualBox to simulate attack/defense scenarios for hands-on practice.

EDUCATION

Bachelor of Computer Applications (BCA)

Moolji Jaitha College, Jalgaon | CGPA: 9.77 (82.67%) | 2022–2025
